PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building real-time web and mobile applications using React.js, Firebase, and REST APIs. Comfortable owning projects end to end, from architecture and database design to deployment. Looking for a developer role where I can contribute to products that actually make a difference.

INTERNSHIPS

Logic Works **Remote**
Software Developer Intern *June 2026 – August 2026*

- Developed a production-ready society management app with a React Native (Android/iOS) frontend and Spring Boot 3.5 (Java 21) backend featuring 20+ REST APIs; used PostgreSQL (JPA) for transactional data and MongoDB Atlas for notifications and GridFS file storage.
- Implemented JWT-based role authentication (Admin, Resident, Security), integrated Razorpay and PhonePe payments, generated PDF/Excel receipts via iText7 and Apache POI, enabled QR-based visitor entry with ZXing, enforced Bucket4j rate limiting, and deployed across local, EC2, and production environments.
- Published on App Store and Google Play.

MIT-ADT University Pune
Full Stack Developer Intern *2025*

- Took ownership of the Faculty Expense Tracker from start to finish, turning a fully manual reimbursement process into a production-ready digital system.
- Brought down submission errors significantly by building automated validation, role-based dashboards, and real-time Firebase sync into the workflow.

PROJECTS

I. Skill Circle – Community Skill-Sharing Platform | GitHub | Live Demo **2024**

- Built a full-stack community platform where users can share skills, post content, and connect with others, deployed on Vercel with real-time sync via Firestore listeners.
- Added a gamification layer with XP points and skill-level progression to keep users engaged and coming back.
- Set up Firebase Auth with Google and Email sign-in, along with real-time profile management across multiple skill categories.

II. Faculty Expense Tracker – Finance Management System | GitHub **2024**

- Developed a role-based portal for managing advance requests, expense settlements, and reimbursements, cutting down manual effort by around 60%.
- Structured the data pipeline with Firebase Auth, Firestore sync, and MySQL to keep financial records clean and audit-ready across multiple roles.

III. FixIt – DIY Repair Assistant (Mobile App) | GitHub **2024**

- Shipped a cross-platform mobile app with 50+ step-by-step DIY repair guides, category navigation, and live content updates through Firestore.
- Built with Firebase Auth and an offline-friendly architecture so the app works smoothly regardless of network conditions.

EDUCATION

MIT Art Design and Technology University **Pune, Maharashtra**
B.Tech – Information Technology (SMAD), CGPA: 6.74 *August 2022 – June 2026*

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+)
Frontend & Mobile: React.js, React Native, HTML5, CSS3, Responsive Design
Backend: Firebase (Firestore, Auth, Realtime DB), Spring Boot (Basics), REST APIs
Databases: MySQL, MongoDB, Firebase Firestore
Tools & Platforms: Git, GitHub, Vercel, Docker (Basics), AWS (Cloud Foundations), Azure (Fundamentals)

ACHIEVEMENTS & EXTRACURRICULARS

- **Best Project Award, School of Computing, MIT-ADT University:** Recognized for Skill Circle in the IT-Software and Mobile Application Development category, Batch AY 2022-2026.
- **1st Place, IdeaSpark Innovation Competition, MIT-ADT University:** Led a 4-member team to win the university-level product innovation challenge, presenting to a panel of industry judges.
- **Core Member, Swift Coding Club, MIT-ADT University:** Helped organize hackathons, coding sprints, and peer workshops; mentored junior students picking up web development.

CERTIFICATIONS

- Apple Certified: App Development with Swift Associate (Certiport, May 2026)
- Apple Certified: App Development with Swift Certified User (Certiport, May 2026)
- AWS Academy Graduate: Cloud Foundations
- Microsoft Azure Fundamentals (AZ-900)
- Java Object-Oriented Programming
- Selenium Essential Training
